Healthcare Hero Spotlight

The Utah COVID Logistics Team under the Unified Command COVID Response was created with the lead from the Dept of Health/Bureau of EMS and Preparedness, Dept Emergency Management, State Procurement, Dept Public Safety and members of the Utah National Guard. Requests come from our representative partners hospital/healthcare using a stoplight dashboard (to indicate the levels of supply need based upon patient care and supply allocations),

biweekly request from Local County Health Departments and Emergency Managers and coordinated with many other special groups.

Since handing out the first PPE kits in March 2020, the ongoing mission for Utah COVID Logistics Team's RSS/DC (Receiving/Staging/Shipping Distribution Center) response for the COVID-19 outbreak is to support critical hospitals, long term care centers, public healthcare, state/tribal agencies, local business, K-12 thru higher education and correctional facilities state wide with scarce high-demand PPE, testing and medication resources due to global disruption and allocation constraints of supply chain systems.

Starting from an empty warehouse to one year later; successfully fulfilling 11,000 requests and shipping over 42 million items, while simultaneously being able to create a 90-day supply of on hand PPE inventory.

The Utah COVID Logistics Team continues to support and standby for future missions for community vaccinations and preparing for potential waves of future resurges.

Rocky Mountain AHRMM thanks the Utah COVID Logistics Team for all their hard work and support!

- **What is CQO?**

In today's rapidly shifting health care landscape where declining reimbursements and changing payment policies are set to be the new norm, how do you ensure your health care organization delivers quality care at a more affordable cost?

As health care executives increasingly recognize that their organization's success relies on the performance and effectiveness of the supply chain, how will you manage their expectations?

Join the Cost, Quality and Outcomes (CQO) Movement and add your voice to a thriving and ever-growing health care community dedicated to sharing and learning from each other to advance the supply chain strategy.
